

To Our Valued Guests,

As you are aware, new Health Orders come into effect this Saturday, August 7 in Manitoba. Even though masks will no longer be required by the province and now be a personal choice, your safety, comfort and the safety of our staff is extremely important to us.

We provide face-to-face services and want reassurance that everyone will remain safe. We know the Delta Variant is still rampant, flu season is approaching, and are now seeing states like California going BACK TO MASKS. We feel the safest choice is to continue wearing our masks for the time-being. We will re-evaluate in the coming weeks as things progress so we can unmask with comfort and not risk illness and future closures. Thank you for understanding this is the choice we are making for now.

#### **What this means for Aevi**

The following will remain the same:

- both **staff and guests will be required to wear masks** at Aevi and treatment room protocols remain the same.
- we will provide hand sanitizer and encourage guests to sanitize at entry/exit.
- frequent cleaning of washrooms and all high traffic areas will continue.
- sanitization of stations between each guest will continue.
- pre-screening for Covid Symptoms via the link on our home page will continue. If you do not feel well, please re-schedule your appointment.
- plexiglass will remain in place until we are certain we will no longer require it.

A few things will change:

- we will return to a dual entry/exit as per pre-pandemic.
- temperature checks will no longer be required at entry.
- the living room will return as a guest waiting area!

We hope our choice to keep these measures in place will give you comfort when you come back for your next visit. Thanks for your continued support and understanding. We can't wait to see you!

xo
